Hi Tonya, here's the comment letter to North Dakota.

I'll keep you posted as our discussion continues on the *feasibility* of NDDEQ's option to adopt the selenium fish tissue criterion for this triennial.

Holly,

Can you send me the text from the ND comment letter explaining why we don't recommend adopting 2016 fish tissue elements to add to existing 1987 water column of 5 ug/L? I'm not finding the text I remember in the implementation docs, so maybe it was an email exchange with HQ I'm remembering.

Tonya  
she/her/hers (what's this?)
